

INFONALIGY

Security Today for Tomorrow's Threats

Infonaligy Delivers **Next Generation** Cyber Security

We Deliver Next Generation Threat Prevention

- The industry's best catch rate for Ransomware, Malware and known and unknown Viruses
- Comprehensive Network Security, Firewall Management, and Data Loss Prevention
- Cloud Services Protection: Office 365 Email, DropBox, Box
- Protection for all of your devices: servers, desktops, and mobile

With the IT environment continuing to evolve rapidly
and now spreading into mobile, cloud and Internet of Things,
your business simply can't afford to be passive about security.

We Deliver Strategic, Business-Focused IT Management

- Management that protects physical and virtual networks, data centers, cloud, mobile, endpoint and IoT devices
- Management that converts cyber threat intelligence into prevention in real time
- Unified management, the most advanced in existence today
- Management that allows you to simplify, consolidate and reduce the security footprint in your network, enabling streamlined and efficient security operations.

Next Generation Threat Prevention

Security that is manageable.
Security that prevents.
Security that keeps you ONE STEP AHEAD.
